

Flashcard Games

Game 1

Set a timer and quiz your student as you go through the stack of flashcards. This can be done individually or with a group of students, as they can work together to figure out the notes. Keep track of the student score using the Music Memory Scorecard. This helps students stay motivated to see if they can break their record from the previous time.

Game 2

Set a countdown timer to challenge the students to complete the set of flashcards in a given amount of time. They can't move on to the next flash card until they give the correct answer. Keep track of the student score using the Music Memory Scorecard. Along with writing their name in the Player column, record how many cards they were able to complete. Also record your predetermined time for the countdown.

Game 3

Group the students into pairs and have them quiz each other with the flashcards. For private piano lessons, quiz the student and then have the student quiz you, the teacher. Keep track of your scores using the Music Memory Scorecard (included in your purchase).

Tip

Give students a set of their own flashcards to practice during the week.
